EDUCATION

Indiana University Bloomington

Master of Science in Computer Science | GPA: 3.67/4.0

Bloomington, IN

Aug 2024 – May 2026

KL University

Bachelor of Technology in Computer Science Engineering | GPA: 8.97/10

Vijayawada, India

Aug 2020 – May 2024

EXPERIENCE

Heartland Community Network

Senior Consultant(Remote)

Indiana, US

Jun 2026 – Present

- Advise on technical strategy and delivery for data and automation-driven initiatives, translating business requirements into scalable, maintainable software solutions.

Indiana University Dining

Inventory Data Analyst

Bloomington, IN

Aug 2025 – May 2026

- Optimized restocking cycles and reduced overstock across 5+ dining units by engineering automated inventory reporting pipelines and trend-analysis tracking that surfaced real-time demand patterns.
- Eliminated inconsistent manual reporting across 3+ operational workflows by redesigning the data pipeline architecture, standardizing documentation, and enforcing logging best practices cross-functionally.

Next Page Technologies

Software Engineer

Hyderabad, India

Jul 2023 – Jul 2024

- Owned core modules of a production CRM platform serving a live client team, designing REST backend services and the relational schema from table design through the endpoints powering lead and sales workflows.
- Automated event-driven workflows (rule-based processing, approval flows, notifications, validation) and enforced role-based, stage-aware access control consistently across frontend and backend.

AICTE Edu Skills

Robotic Process Automation Intern

Hyderabad, India

Jan 2022 – May 2022

- Cut manual data processing time by 25% across invoice and web-form workflows by building automated extraction and validation pipelines in Python and deploying REST-integrated notification and report services.
- Delivered 4 scalable, reusable automation solutions by applying OOP design patterns to modularize RPA components and driving architecture decisions with cross-functional stakeholders.

PROJECTS

NoteKit – Grounded RAG Learning Platform | Python, FastAPI, PostgreSQL/pgvector, LangGraph, Next.js

Aug 2026

- Built an end-to-end RAG platform that turns web sources and user uploads into cited study modules with practice quizzes, combining dense-vector and PostgreSQL full-text retrieval via reciprocal-rank fusion and cross-encoder reranking.
- Achieved 95.3% automated claim faithfulness and 16/16 correct refusals on a fixed benchmark; cut first-prose latency 65% (52s to 18s) and quiz-enabled course cost 48% via concurrent asyncio/SSE streaming and prompt caching.

RatePilot – Autonomous Bill Negotiation Agent | Python, LLM APIs, Tool Use, Gmail API

May 2026

- Built an autonomous LLM agent running a multi-stage reasoning loop that researches live competitor pricing via a web-search tool, formulates strategy, and drafts outreach, with stateful accept/counter/escalate decision logic grounding every action in real pricing data.
- Engineered end-to-end autonomy with no manual input: monitors inbound replies via the Gmail API, chooses the next move each round, and preserves a complete audit trail of decisions and reasoning across sessions.

Real-Time Edge AI Vision System | Python, YOLOv8, Raspberry Pi, OpenCV

Sep 2025

- Improved on-device inference throughput 40% with zero cloud dependency by building a real-time vehicle detection and speed-monitoring system on Raspberry Pi using YOLOv8 with modular pipelines and multi-object tracking.
- Delivered sub-second on-device inference on constrained hardware by optimizing frame-analysis pipelines and deploying an automated violation-detection alert system with centralized logging.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, C++, SQL, HTML/CSS

Frameworks: React.js, Vite, FastAPI, Flask, Django, REST APIs, LangChain, LangGraph

ML & AI: Agentic AI, Transformers, RAG, YOLOv8, OpenCV, TensorFlow, PyTorch, scikit-learn

Cloud & DevOps: AWS (EC2, S3), Azure, GCP, Docker, Kubernetes, GitHub, CI/CD, Linux/Unix

Databases & Tools: PostgreSQL, MySQL, SQLite, Microservices, System Design, OOP, DSA

CERTIFICATIONS & PUBLICATIONS

Certifications: AWS Solutions Architect – Associate; AWS Cloud Practitioner (CLF-C02); Microsoft Azure Fundamentals (AZ-900); Red Hat Certified Enterprise Application Developer; Google Cloud Associate Cloud Engineer

Publication: “Survey of Non-English Language Compilers: Exploring the Diversity of Programming Languages,” 2023 9th ICACCS, Coimbatore, India, pp. 1187–1193
